FEATURES :

CARVER 6013 is a rutile based, medium coated general purpose electrode suitable for welding mild steels. The superb and controlled flux formulation ensures excellent performance of the electrode in AC/DC (+) in all welding positions. With its soft, forceful & steady arc, easy slag detachability, fine rippled & shiny bead and characteristics like easy maneuverability in all position make CARVER 6013 a welder-friendly electrode. We can supply flux cored wires also.

APPLICATIONS :

CARVER 6013 is suitable for all sorts of joining, repairing and fabrication of structural works in mild steels. The applications include: welding of Structures, bridges, automobile bodies, automobile parts, machinery fabrication, steel, furniture, railway coaches & wagons, ships, tugs, barges, trawlers, dredgers, storage tanks, boilers, pipelines, grills etc.

OPERATIONAL CHARACTERISTICS :

- Uniform metal transfer.
- Easy to control weld pool and slag in all positions.
- Suitable for either polarity in DC and AC with OCV as low as 45V.
- Takes care of poor fit-up joints and fills wider gaps with superior quality weld.
- Usability as a contact type electrode.
